Average Complicated Cooled Shipped/cycle  Complicated cycles are those mares with uterine infections, retained uterine fluid, uterine inertia, advanced maternal age, stallion subfertility or stallions providing low dose shipments, twins, rebreeds after dystocia or retained fetal membranes, or intractable mares requiring additional handling and/or sedation.	\$1500-1800
Average Uncomplicated Cooled/Shipped for on-site Embryo Transfer with recip management/cycle	\$3000-3500
Average Uncomplicated Cooled/Shipped for off-site Embryo Transfer*/cycle	\$2000-2800

**All services are billed as administered. There are NO established guaranteed package prices. The above prices/cycle listed are provided only as a reference. Please carefully review your stallion contract and collection days. Stallions collecting on a every-other-day schedule result in collection dates without service from FedEx/UPS and require semen to be flown on commercial aircraft, which can add additional courier and after-hours fees.**

\*Requires pre-approval to ensure that flight schedules allow for appropriate delivery of embryo to desired facility

\*\*Requires pre-approval from staff veterinarian to ensure frozen semen is from reputable source.
